Upon

Software Engineering student looking for opportunities to apply knowledge in full-stack development and development using Artificial Intelligence. Experience in academic, professional and extension projects, with a focus on innovation, remote work, problem solving and continuous learning.

Knowledge

Experience with programming languages such as JavaScript, TypeScript, Dart, Python, C, C#. I use frameworks and libraries such as .NET, React, React Native, Redux Toolkit, Flutter and Node.js. I know relational databases, especially MySQL and PostgreSQL, in addition to using tools such as Git, GitHub, GitLab, Postman, Docker and Figma in the workflow. I also apply concepts of agile methodologies, with an emphasis on Scrum.

I demonstrate resilience, proactivity, creativity and commitment to results. I find it easy to solve problems, collaborate as a team, and adapt to different work scenarios.

Portuguese (native language), advanced English (C1), basic Spanish (A2).

Academic Experiences and Projects

Full Stack Developer - Acessa UnB DACES/UnB Project, April 2024 - January 2025

University extension project with Flutter and Dart (front-end) and Node.js + MySQL (back-end). Version control practices with Git and GitLab. With the aim of applying inclusion by developing a mobile application to assist the autonomous locomotion of people with disabilities on campus.

Full-Stack Developer - UnB/MEPA Energia, November 2024 - March 2025

I developed website features using Front-end and back-end technologies such as: React, TypeScript, Git, GitLab, Docker, Python, Django. The project was a partnership between the University of Brasília and MEPA Energia.

Front-End Developer - Pagglo, Brasília DF (Internship), January 2024 – May 2025

Development of iOS/Android applications with React Native, Redux Toolkit, TypeScript and JavaScript. Integration with APIs (Postman) and versioning using Git and GitHub. Participation in code reviews and agile methodologies (Scrum).

Full-Stack Developer - UnB/DNIT, March 2023 - July 2023

I developed a system for school security at risk near highways using Front-end and back-end technologies such as: .NET, C#, React, TypeScript, PostgreSQL, Git, GitHub, Figma. The project was carried out with a partnership between the University of Brasília and the public agency DNIT in order to consolidate a solution to the proposed problem. The project used agile methodologies and active communication for its success.

Education

Software Engineering

UnB, University of Brasília (UnB) – July 2021 – Present (Expected graduation in December 2025)

Certifications and Complementary Courses

[AI Crewed AI Agent Multi Systems Course Completion Certification – Jan 2025 – Feb 2025](#)

[RocketSeat NLW AI Course Attendance Certification – September 2023](#)

Certification in participation in the NLW Expert event in React Native by RocketSeat – Feb 2024

Certification in participation in the NLW Agents Advanced event by RocketSeat – May 2025
